

Rockley Falls Quarry Monthly Noise Monitoring Results July 2008 to June 2009

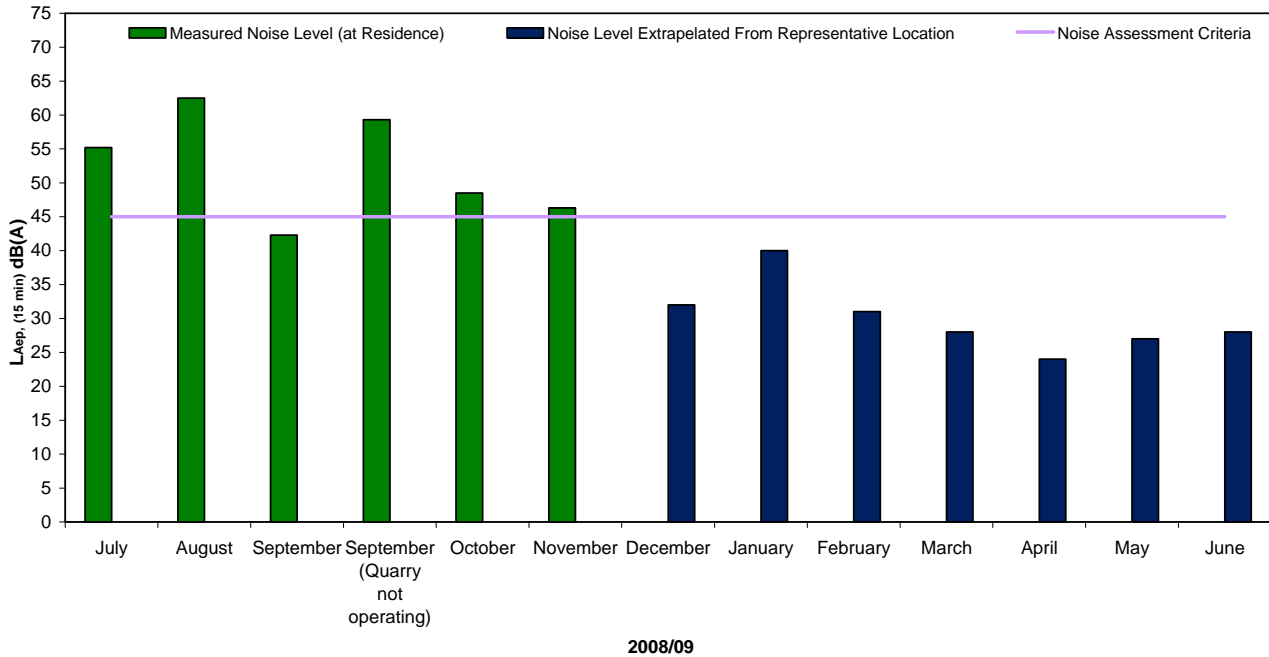

Please note noise monitoring results from July to November 2008 inclusive were affected by extraneous noise sources (i.e. Hume Highway and Lubke Quarry), hence it is not possible to accurately assess compliance with the noise assessment criteria at the nominated residential receiver locations. To accurately determine compliance with the noise assessment criteria alternate monitoring locations, representative to the receiver locations have been chosen in consultation with the Department of Planning. Monitoring commenced at these locations in December 2008.
